Summary

<2000um fraction results are exported from Mastersizer software into Excel Spreadsheet

>2000um fractions are calculated and added to Spreadsheet

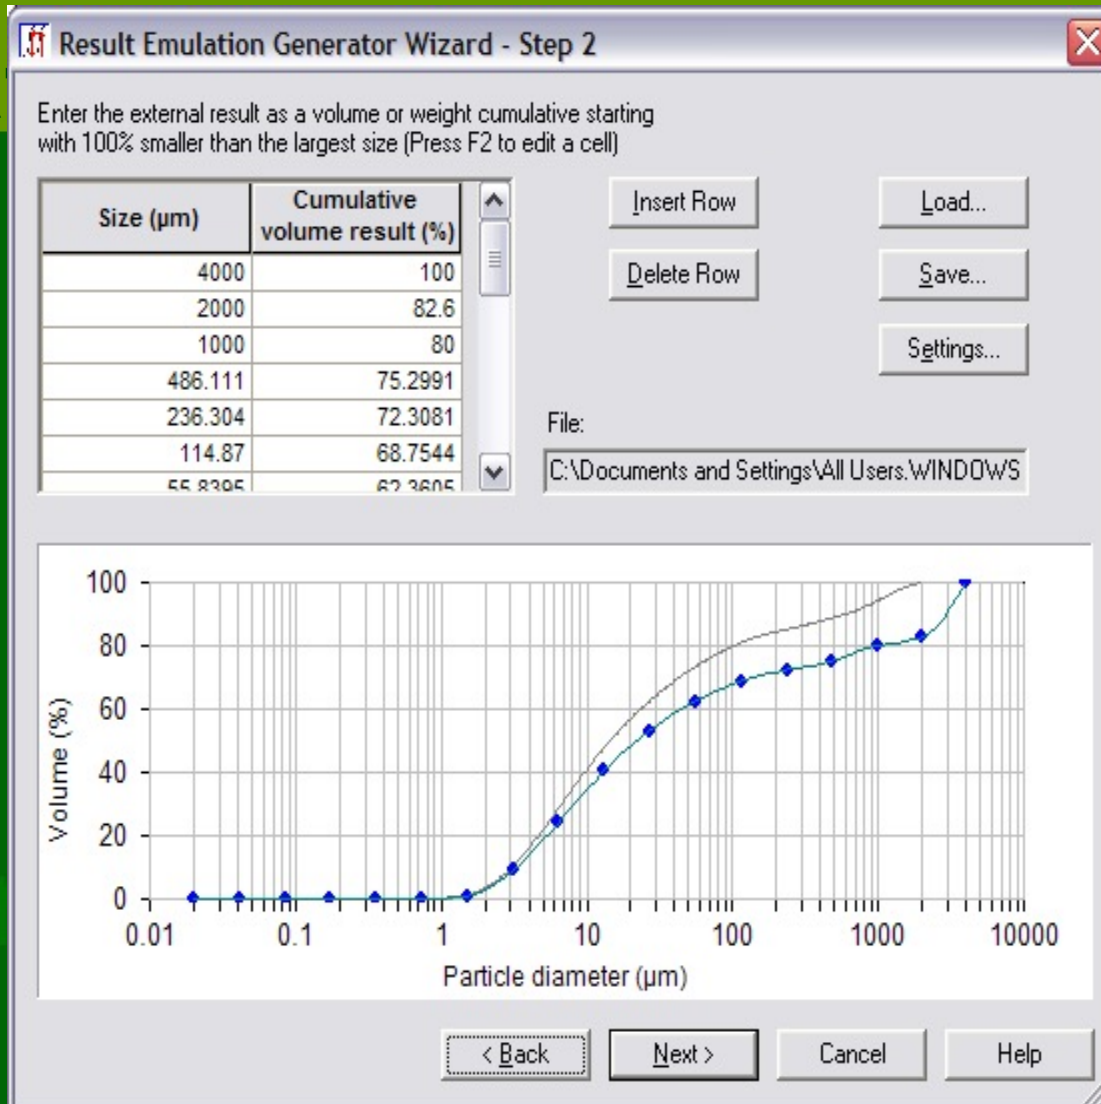

create a better place

National Laboratory Service

Spreadsheet re-calculates band-size data for the whole sample

New data added to the Result Emulator function and the software re-calculates a new distribution

create a better place

National Laboratory Service

Advantages

Quick and easy – no difficult calculations

Provides data for the Whole sample analysed

create a better place

National Laboratory Service

Disadvantages

Doesn't always add up
Negative results for band-size data
