Specimen Images and Detailed Breakdown of Identifications

The common names provided include those stated in FishBase (<http://www.fishbase.org/search.php>) first followed by other commonly used names, where appropriate. An additional terminal character has been added within each LabCode (small case sequential letters) to denote multiple data entries from each laboratory, *i.e.* two participants from laboratory 2001 would be coded as Lab 2001a and Lab 2001b. For details of your LabCode please contact your Scheme representative or Thomson Unicomarine Ltd. All specimens submitted were of a good condition.
